

Guess the country warmer cooler game

Ask a question from below that you are sure of the answer to, and see if your partner can guess the answer. If your partner's first guess is wrong, give them hints about where that place is on the map compared to their last guess, plus other another hint if you can. Continue until they get exactly the right country, then guess your partner's country from the same kind of question and hints. If you are scoring points, you get six points if you are right with your first guess, five points if you are right with your second guess, etc.

"It's	(much/ a lot) (quite a lot) (a little)	(further)	North." East." South." West." Northeast." Southeast." Southwest." Northwest."
