

Is there/ Are there plus prepositions mix and match

Use the cards to make a question which you are sure that your partner will say "No" to like "Are there many bugs in your pockets?" They will answer the question and then they will try to change your question to one that you say "Yes", if possible a question with only one or two cards changed like "Are there many bugs in your garden?". If you can find a blank card, you can write any word you like on it to help you make your question.
