

Recommendations and invitations for visitors review

Choose one of the categories in the big list below and recommend something of that kind to your partner and/ or invite them to do it together (as your teacher tells you to). Your partner will listen, maybe ask for more details, then react positively or negatively (as they think a foreign visitor would react). Switch roles and do the same until your teacher stops you.

Ask about any categories below which you don't understand or can't think of recommendations for, discussing suitable recommendations as a class each time.

Recommend things below for a foreign visitor to try. Your partner will pretend they know nothing about that thing and keep asking for explanation until they think they would understand what you are talking about. They will then accept or politely reject your recommendation, depending on what they think a foreign guest would do.

Suggested follow-up questions

(I'm afraid I've never heard of.../ I've heard of... but I'm not sure what it is.) What is...?

Is it like...?

Is it a kind of...?

Where...?

Why do you recommend... (for me)?

Ask about anything you below you don't understand, can't think of examples of, etc, working together to think of suitable examples to recommend each time.

Find or think of at least example of each category on the next two pages.
